

Internet Security Solutions

Are you concerned about....

- *On-line threats, hate material, etc. ?*
- *Inappropriate Web browsing ?*
- *Illegal content downloads ?*
- *Excessive use of bandwidth ?*
- *External risk and liability ?*
- *Missing a critical threat because of the limited capacity of older technology ?*

Do you need....

- *A more integrated approach to Internet security ?*
- *High performance, less intrusive solutions ?*
- *Highly automated, management-focused tools ?*
- *New AND Proven solutions ?*

ContentKeeper delivers both NEW design and PROVEN technology solutions to address these issues.

....please see the following page for details.....

Internet Security Solutions

NEW:

Integrated, Transparent Ethernet Bridge Gateway Technology:

- Supporting high-traffic Web Filtering environments and gigabit networks speeds
- NO dropped packets on busy networks

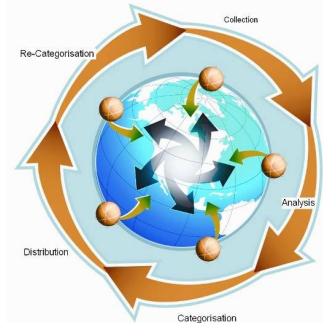

Fastest (hourly) updates for new Internet based threats:

- Based on ContentKeeper Closed-Loop Collaborative Filtering™ Process

Fully Automated and Unattended:

- Updates – threat identification and software
- Real-Time Alerts – Internet access thresholds, specific content threats, trends, hot spots
- Management Reports – large storage capacity, report generation & delivery

Non-Intrusive Implementation:

- A Web Filtering trial installed in less than half a day
- No changes to your existing network – one transparent Appliance delivered fully loaded
- Even runs in trial mode without interfering with any existing filtering product
- Coexists with almost any network configuration based on gateway design

PROVEN:

Over 2 million ContentKeeper Web Filtering Users:

- In Enterprises up to 100,000 users.

Integrated Anti-Virus Signatures from F-Secure:

- World leader in AV solutions for over 10 years.

ContentKeeper Guardian:

- Identifying electronic threats, bullying, hate material etc. for over 5 years.

Advanced Reporting Module:

- For large enterprise management of logged data, with automated report generation and delivery based on integrated WebSpy technology, used globally for over 10 years.
